INTRODUCTION

ABOUT US

SSI Diagnostica has a long tradition of developing and producing high quality antisera, antigens, culture media and innovative diagnostic tests. We also market products for veterinary diagnostics, food control, as well as environmental and hygiene control to the global market.

Our products are used by national reference centers and hospital laboratories worldwide for microbial detection and to guide treatment.

In 2016 SSI Diagnostica A/S came as a spin-off from Statens Serum Institut and we are thereby building our business on decades of knowledge and experience. After the divestiture of SSI Diagnostica, many new and exiting initiatives have been carried through. We have upscaled and invested in production facilities and modern equipment contributing to better working environment and increased product quality.

In 2020 we bought the US founded CTK Biotech to expand our portfolio including fast diagnostic tests within infectious diseases among others, and to enhance our distributor network.

SSI Diagnostica is your one stop shop for innovative diagnostics for clinical microbiology.

ORDERING

Please contact your local SSI Diagnostica representative for prices and ordering. The list of distributors can be found in our website: ssidiagnostica.com/distributors

If your country is not listed, please send your orders and inquiries to: ivdorders@ssidiagnostica.com
You may also place your order on our webshop: shop.ssidiagnostica.com.

QUALITY ASSURANCE

SSI Diagnostica's development, production, and sales of *in vitro* diagnostics are quality assured and certified in accordance with ISO 13485. Products with CE-labelling meet the definitions in Council Directive 98/79/EC of 27 October 1998 on *in vitro* diagnostic medical devices.

SSI Diagnostica is registered at the U.S. Food and Drugs Administration (FDA). Registration number is 9611882. SSI Diagnostica antigens, antisera and culture media are listed at FDA as either Class 1 or Class 2 exempt medical device. Products not listed at FDA are marked "Not available in the US".

IMMUVIEW® – RAPID TESTS (POINT OF CARE)

ANTIGEN TESTS

Result within only 15 minutes. Store at room temperature.

ImmuView® *S. pneumoniae* and *L. pneumophila* antigen test is the only rapid urinary antigen test which identifies both *S. pneumoniae* and *Legionella pneumophila* in one single test

ImmuView® can be used in patients with presumed pneumococcal pneumonia, meningitis, and *Legionella* infection (Legionnaire's disease) allowing clinicians to initiate the correct antibiotic treatment.

Shelf life is minimum 5 months from date of shipment.

ImmuView® *S. pneumoniae* antigen test is a quick and simple urinary antigen test, which makes it possible to detect *S. pneumoniae* in patients with presumed pneumococcal pneumonia or meningitis.

ImmuView® *S. pneumoniae* allows clinicians to initiate the correct antibiotic treatment.

Shelf life is minimum 2 months from date of shipment.

ImmuView® *L. pneumophila* and *L. longbeachae* antigen test is the only rapid urinary antigen test that detects two types of *Legionella* with only one test.

Legionella longbeachae is the second most common *Legionella* species causing human infection.

In contrast to the well-known *Legionella pneumophila*, *Legionella longbeachae* is not found in water, but in soil e.g. in potting mixes, compost heaps and composted animal manures.

Shelf life is minimum 2 months from date of shipment.

ImmuView® RSV antigen test detects respiratory syncytial virus in nasopharyngeal swab or nasal wash specimens, directly from symptomatic patients.

Shelf life is minimum 3 months from date of shipment.

ART. NO.	PRODUCT	NO. OF TESTS	PACKING	AVAILABILITY
95389	ImmuView® <i>S. pneumoniae</i> and <i>L. pneumophila</i> *	22	1 box	In stock
2451	ImmuView® <i>S. pneumoniae</i> and <i>L. pneumophila</i> – US version	22	1 box	In stock
98748	ImmuView® <i>S. pneumoniae</i> *	22	1 box	In stock
98749	ImmuView® <i>L. pneumophila</i> and <i>L. longbeachae</i> *	22	1 box	In stock
99110	ImmuView® RSV*	22	1 box	In stock

* Not available in the US.

PCR

E. COLI PCR

The **DEC PCR kit** contains all reagents and controls needed to perform a multiplex PCR detection of virulence genes of diarrhoeagenic *E. coli* (DEC). It detects the groups EHEC, EIEC, EPEC and ETEC. The two buffers for preparation of template must be stored at room temperature whereas the reagents for the PCR reactions must be stored at -20°C. Shelf life of the kit is minimum 6 months from date of shipment.

The **DEC primer mix** including controls is for your own PCR setup. The product must be stored at -20°C. Shelf life is minimum 6 months from date of shipment.

ART. NO.	PRODUCT	NO. OF TESTS	PACKING	AVAILABILITY
73410	DEC PCR kit*	100	1 box	In stock
62870	DEC primer mix	100	1 box	In stock

DERMATOPHYTE PCR

The **Dermatophyte PCR kit** contains all reagents and controls needed to perform a multiplex PCR detection of dermatophytes causing fungal infections in nails. The product must be stored at -20°C and the shelf life is minimum 6 months from date of shipment.

The **Dermatophyte Real Time** PCR kit detects dermatophytes (pan-dermatophytes) from nail samples, specifically *T. rubrum*. The kit contains all reagents needed for the analysis. It is shipped with cooling elements and should be stored in a dark place at -20°C immediately on receipt. Shelf life is minimum 6 months from date of shipment.

ART. NO.	PRODUCT	NO. OF TESTS	PACKING	AVAILABILITY
73411	Dermatophyte PCR kit*	100	1 box	In stock
98730	Dermatophyte Real Time PCR kit*	100	1 box	In stock

* Not available in the US.

ANIMAL BLOOD PRODUCTS

SSI Diagnostica produces and sells bovine, horse, and sheep blood products from its own herd of healthy, non-medicated donor animals. Thus, we secure supplies of high-quality blood with full traceability, and the highest standard of animal welfare through good husbandry. The blood is collected aseptically, and each batch is tested for sterility after 48 hours of incubation. Shelf life for blood is 3 weeks from production date when stored at 2-8°C and used for culture media supplement. Shelf life for sterile filtered horse serum is 6 months from production date when stored at 2-8°C.

BOVINE BLOOD (CE)

ART. NO.	PRODUCT	PACKING	AVAILABILITY
77665	Bovine blood with citrate*	50 mL	Produced to order
77667	Bovine blood with citrate*	100 mL	Produced to order
77668	Bovine blood with citrate*	0.5 L	Produced to order

HORSE BLOOD (CE)

ART. NO.	PRODUCT	PACKING	AVAILABILITY
23699	Horse blood, defibrinated*	100 mL	Produced to order
23700	Horse blood, defibrinated*	0.5 L	Produced to order

957	Sheep blood in Alsevers solution (1+1) *	0.3 L	Produced to order
23689	Sheep blood, defibrinated *	100 mL	Produced to order
23690	Sheep blood, defibrinated *	0.5 L	Produced to order

* Not available in the US.

STERILISATION CONTROL

Microbiological monitoring is necessary to ensure that any microorganisms present are eliminated by the sterilisation process. The indicators are designed for both validation and routine monitoring of sterilisation processes at hospitals, clinics (including dentists and practitioners), and in industry. The shelf life of biological indicators is minimum 1 year from date of shipment, and for chemical indicators it is minimum 2 years from date of shipment.

BIOLOGICAL INDICATORS - STEAM STERILISATION

ART. NO.	PRODUCT	PACKING	AVAILABILITY
75620	SIMICON ST/DA, <i>G. stearothermophilus</i> 10 ⁵ *	3 pcs.	In stock

ANTISERA

SSI Diagnostica produces a comprehensive range of polyclonal antisera including kits for typing of *E. coli*, *S. pneumoniae*, *Salmonella* and *Streptococcus*. SSI Diagnostica can also supply a smaller range of antisera for *Yersinia*, *Shigella* and *H. influenzae*.

ImmuLex™ is the brand name for all latex based agglutination antisera.

The antisera have been obtained from blood of certified healthy rabbits. The antisera are tested for specificity and absorbed free from relevant cross-reactions. Information concerning this is provided in the certificates of analysis.

Our certificates of analysis can be downloaded from our website:
ssidiagnostica.com/Downloads/Certificate-of-Analysis.

The shelf life of our antisera is minimum 2 years from date of shipment, except for the ImmuLex *H. influenzae* and *E. coli* H pool antisera, which have minimum 1 year shelf life from date of shipment.

ANTISERA – E. COLI

SSI Diagnostica is offering all *E. coli* antisera for full serotyping of O, H and K antigens. Additionally, SSI Diagnostica sells a selection of the most commonly used OK O and F antisera.

E. coli O antisera are for boiled culture in microtiter plates and *E. coli* H antisera are for agglutination in a Widal glass. OK O antisera are for screening of O antigens and for slide agglutination. *E. coli* K antisera are for counter current immunoelectrophoresis.

E. coli O and H antisera are monospecific with a few exceptions.

Furthermore, it is possible to purchase a selection of the most important bacteriophages.

E. COLI OK O POOL ANTISERA FOR SLIDE AGGLUTINATION

ART. NO.	PRODUCT	REACTS WITH ANTIGEN	NO. OF TESTS	PACKING	AVAILABILITY
44292	OK O Pool 1 EPEC/VTEC/STEC	O26, O103, O111, O145, O157	150	3 mL vial	In stock

ANTISERA - PNEUMOCOCCUS

Pneumococcus antisera are manufactured for the capsular reaction test (Neufeld) or latex agglutination. All antisera are polyclonal and produced in rabbits. The specific pool, group and type antisera are absorbed free of cross-reactions. Factor antisera are absorbed free of cross-reactions within the group.

16965	Factor 20b	33A	300	1 mL vial	In stock
16966	Factor 22b	22F	300	1 mL vial	In stock
16967	Factor 22c	22A	300	1 mL vial	In stock
16968	Factor 23b	23F	300	1 mL vial	In stock
16969	Factor 23c	23A	300	1 mL vial	In stock
16970	Factor 23d	23B	300	1 mL vial	In stock
16971	Factor 24c	24A	300	1 mL vial	In stock
16972	Factor 24d	24F, 24A	300	1 mL vial	In stock
16973	Factor 24e	24B	300	1 mL vial	In stock
16974	Factor 25b	25F	300	1 mL vial	In stock
16975	Factor 25c	25A	300	1 mL vial	In stock
16976	Factor 28b	28F	300	1 mL vial	In stock
16977	Factor 28c	28A	300	1 mL vial	In stock
16978	Factor 29b	35B	300	1 mL vial	In stock
16979	Factor 32a	32F, 32A	300	1 mL vial	In stock
16980	Factor 32b	32A	300	1 mL vial	In stock
16981	Factor 33b	33F, 33A	300	1 mL vial	In stock
16982	Factor 33e	33C	300	1 mL vial	In stock
16983	Factor 33f	33B, (33C), 33D	300	1 mL vial	In stock
16984	Factor 35a	35F, 35A, 35B, 35C	300	1 mL vial	In stock
16986	Factor 35b	35F	300	1 mL vial	In stock
16992	Factor 35c	35A, 35B, 35C	300	1 mL vial	In stock
16994	Factor 41a	41F, 41A	300	1 mL vial	In stock
16995	Factor 41b	41F	300	1 mL vial	In stock
16996	Factor 42a	35C	300	1 mL vial	In stock
16997	Factor 43b	47A	300	1 mL vial	In stock
16998	Factor 47a	47F, 47A	300	1 mL vial	In stock

PNEUMOCOCCUS ANTISERUM AGAINST CELL WALL POLYSACCHARIDE (CE)

ART. NO.	PRODUCT	NO. OF TESTS	PACKING	AVAILABILITY
3653	Anti CWPS (Cell Wall Polysaccharide)	300	1 mL vial	In stock

PNEUMOCOCCUS MONOCLONAL ANTIBODIES (RUO)

This product is for research use only.

ART. NO.	PRODUCT	PACKING	AVAILABILITY
87215	HASP8 with specificity for the C-polysaccharide "backbone"	200 µL	Produced to order

PNEUMOCOCCUS HIGH TITER ANTISERA (CE)

Based on SSI Diagnostica's long-term knowledge within the field of pneumococcal antisera, we also produce High Titer pneumococcus antisera. Our High Titer antisera are routinely validated by the Quellung reaction method, and in some cases by the Nephelometry method, IMMAGE 800.

For more information, please contact info@ssidiagnostica.com

ANTISERA - SALMONELLA

SSI Diagnostica *Salmonella* antisera can identify O and H antigens and the capsular antigen Vi. The *Salmonella* antisera are for slide agglutinations or phase inversions, respectively.

SALMONELLA SEROTYPING KITS (CE)

ART. NO.	PRODUCT	NO. OF TESTS	PACKING	AVAILABILITY
18349	<i>Salmonella</i> Sero-Quick Group kit	150	1 box	In stock
18350	<i>Salmonella</i> Sero-Quick ID kit	150	1 box	In stock

SALMONELLA ANTISERA AND MONOCLONAL ANTIBODY FOR SEROLOGICAL CONFIRMATION BY SLIDE AGGLUTINATION (CE)

ART. NO.	PRODUCT	REACTS WITH FACTOR	NO. OF TESTS	PACKING	AVAILABILITY
40211	Poly A-E + Vi	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12, 14, 15, 19, 20, 27, 34, 46 + Vi	150	3 mL vial	In stock
73517	Poly A-E + Vi	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12, 14, 15, 19, 20, 27, 34, 46 + Vi	50	1 mL vial	In stock
44807	Poly A-I + Vi	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 19, 20, 22, 23, 24, 25, 27, 34, 46 + Vi	150	3 mL vial	In stock
73518	Poly A-I + Vi	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 19, 20, 22, 23, 24, 25, 27, 34, 46 + Vi	50	1 mL vial	In stock
48954	Poly A-S + Vi	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 27, 28, 30, 34, 35, 38, 39, 40, 41, 46 + Vi	150	3 mL vial	In stock
73519	Poly A-S + Vi	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 27, 28, 30, 34, 35, 38, 39, 40, 41, 46 + Vi	50	1 mL vial	In stock
81061	Poly 42-67	42, 43, 44, 45, 47, 48, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 65, 66, 67	50	1 mL vial	In stock

ACCESSORIES

REACTION CARDS FOR LATEX PRODUCTS

ART. NO.	PRODUCT	NO. OF TESTS	PACKING	AVAILABILITY
53285	Reaction cards for latex agglutination, 200 pcs.	600	1 box	In stock
88464	Reaction cards for latex agglutination, 50 pcs.	150	1 box	In stock

RACKS FOR SERA BOTTLES

ART. NO.	PRODUCT	PACKING	AVAILABILITY
78219	Rack with room for 5 x 10 glass bottles (<i>Salmonella</i> : 3 mL and <i>E. coli</i> : O, H, F and K antisera bottles) L=24,5 cm x W=12 cm x H=7,5 cm	1 pc.	In stock
78220	Rack with room for 8 x 12 glass bottles (<i>Salmonella</i> : 3 mL and <i>E. coli</i> : O, H, F and K antisera bottles) L=29 cm x W=19,5 cm x H=7,5 cm	1 pc.	In stock
78221	Rack with room for 4 x 6 plastic sera bottles (<i>Salmonella</i> : 1 mL <i>E. coli</i> : OK O, and all latex antisera bottles) L=11 cm x W=7 cm x H=3,5 cm	1 pc.	In stock

BACTERIAL STRAINS

SSI Diagnostica offers a vast range of bacterial strains. The bacterial strains are characterised by current serological nomenclature. *E. coli*, *H. influenzae* and *Salmonella* strains are supplied as agar sticks, whereas *S. pneumoniae* and *Streptococcus* are supplied freeze-dried.

When ordering bacterial strains, please send along a signed Material Transfer Agreement. The Material Transfer Agreement can be downloaded from our website ssidiagnostica.com/MTA.

A dangerous goods fee will be charged for shipments of bacterial strains either UN3373 or UN2814.

E. COLI STRAINS

E. coli strains are supplied as agar sticks.

CULTURE MEDIA

SSI Diagnostica manufactures and markets culture media for isolation and identification of microorganisms. The aseptic production of culture media takes place in automated equipment for filling of large volumes at a consistent and high quality. Many of the media formulations are developed at SSI Diagnostica for specific diagnostic purposes and produced from chemicals and biological raw materials. Other internationally accepted standard culture media are produced from commercially available dehydrated media.

The products listed below represent the most essential culture media for serotyping available from SSI Diagnostica. For the full list of our culture media products, please visit our webshop at shop.ssidiagnostica.com

We also manufacture a wide range of products made to the customers' specific formulation and/or packaging requirements. Contact us for further information or special requests at info@ssidiagnostica.com
